

SPRAY TAN *maintenance*

GUIDELINES

BEFORE RINSING

Do not get wet or sweat until your initial rinse. This means no showering, working out, lotions, or liquid foundations on the skin until after you take your initial rinse. If you have pets, do not let them lick you.

FUTURE SHOWERS

Avoid using any loofahs or wash rags during your showers. It is best to wash with hands only in areas where needed (pits + privates) to ensure a long-lasting tan. A gel-based body wash is best.

NO TOUCHING

If you touch yourself while your tan is developing, this could result in stained palms.

ACTIVITY CHECK

Avoid swimming in the pool/ocean for long periods of time, long hot showers/baths, saunas, and excessive sweating. Your tan will not last very long if you are planning to do any of these activities.

INITIAL RINSE

If you do not rinse at your designated time, your tan may develop too light or too dark. Do not use soap. Temperature should be lukewarm. If you see streaks after getting out the shower, hop back in and use your hand to guide the leftover bronzer off.

STAY HYDRATED

The more hydrated your skin is, the longer your tan will last. Your moisturizer should be free of mineral oil and artificial fragrance. You may use a tan extending lotion that contains DHA after day three. In addition, be sure to drink lots of water.
